

How to use MS adhesives out of the bag

Remove the lid, place the bucket on its side and take out the plastic bag

Place the bag upright on the ground

Make a cut of approx. 1.25 inch at the top of the bag

Pour enough adhesive for 10 square feet on to the floor

In order to use a partial quantity – squeeze out the air, place the bag back in the bucket. The adhesive allows the bag to self-seal.

Place the lid on the bucket and press the edges down all around the lid for a good seal

If using the entire bag, squeeze out the remaining adhesive and cut the bag

Remove the remaining adhesive with a trowel, dispose of the bag

How to use MS adhesive out of the bag

Lift the edges of the lid all round the bucket and remove the lid

Open the seal at the top of the plastic bag and pull the bag around the outside of the bucket

Tip the bucket and pour enough adhesive for approx. 10 square feet on to the floor

In order to use a partial quantity – pull the bag back from around the bucket, squeeze out remaining air and re-seal the bag

Place the lid back on the bucket and press down the edges all around the lid for a good seal

If using the entire bag, squeeze out the remaining adhesive and cut the bag

Remove the remaining adhesive with a trowel, dispose of the bag
